

HEADSHOK LEFTY

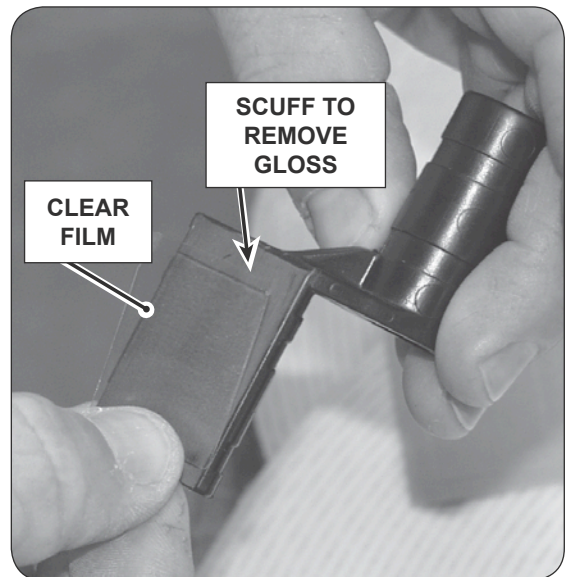

COMPUTER MOUNT KIT - KF364/

INSTRUCTIONS

Cannondale **KF364/** is a computer mounting kit for 2004 to present Lefty forks. Most computer systems can be fitted to the mount. The kit contains a plastic mount and hardware (two zip ties and backing film) needed to secure the mount to the Lefty's lower leg. The mount should be installed by an experienced bike mechanic and no modifications should be done to the mount, the computer parts, or the Lefty.

1. Scuff the back of the plastic mount with fine grit sandpaper to remove the gloss. Peel off the backing and apply the clear film patch included with kit to back of mount.
2. Position the mount on forward facing surface of the fork as shown. **ENSURE GOOD CLEARANCE WITH BRAKE DISC AND SPOKES.**
3. Adjust the mount position for sensor/magnet gap. See the computer manufacturer's instructions. Secure the mount tightly with the two zip ties included in the kit. Make sure the mount can not move up or down, or side to side.

MAINTENANCE: Attachment of the mount should be checked before each ride and periodically. Make sure it is attached securely.
